Locks
and
Latches

NUMBERING OF ESCUTCHEONS

Cast Bronze Escutcheons suitable for Locks are mentioned under the description of each Lock. All other Escutcheons having same terminals as the base numbers in Cast Bronze are also suitable for same Locks, as shown in the following table. All Bronze Metal Escutcheons, Cast and Wrought, are numbered in thousands. Iron and Steel Escutcheons are numbered under one thousand, but terminals are same as in Bronze Metal numbers

Plain Pattern Escutcheons have the letter P prefixed to numbers
 The Fraction $\frac{1}{4}$ affixed to numbers denotes Raised Wrought Metal
 " " $\frac{3}{4}$ " " " " Solid " "
 " Letter B prefixed " " " Blank Escutcheon
 " " L " " " " Wide Keyhole
 " " T " " " " Turn Knob
 " " V " " " " Keyhole above Knob
 Escutcheons of same size, design, etc., without Turn Knob are same price

NICKELINE FINISH

Solid White Metal of special composition, adapted for Bathroom and Toilet Trimmings, can be furnished to special order at advance cost over Plain Bronze

FINISHES SUITABLE FOR DESIGNS ON VARIOUS KINDS OF WOOD

Designs having plain polished surfaces are best adapted for polished finishes, while those having roughed or matt surfaces usually require a sand finish

HAND OF DOORS

Right Hand

Left Hand

Right Hand, Reverse Bevel

Left Hand, Reverse Bevel

The Hand of a Door is determined from the outside of a Building, Room or Closet
In ordering Locks or Latches that are not reversible, the Hand of the Lock must always be specified

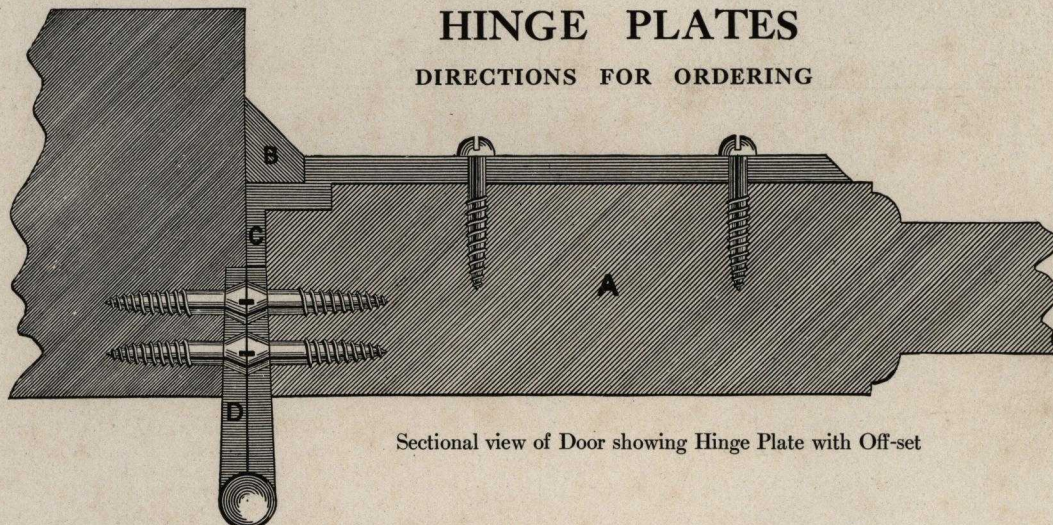

Right Hand Doors require Right Hand Locks
Left Hand Doors require Left Hand Locks

Reverse Bevel.—The term "Reverse Bevel" used under above cuts refers to the latch-bolt
Reversed Doors are Doors opening out as Front or Corridor Doors

Right Hand Reversed Doors require Right Hand Reverse Bevel Locks
Left Hand Reversed Doors require Left Hand Reverse Bevel Locks

HINGE PLATES

DIRECTIONS FOR ORDERING

Sectional view of Door showing Hinge Plate with Off-set

All Hinge Plates are made without Off-set, unless otherwise specified in order

Hinge Plates with Off-sets can be furnished to order at extra cost. When ordering, be particular to give measurements as follows:

- | | |
|-------------------------|--|
| 1 Hand of Door | 5 Length of Drop (C) to meet Butt |
| 2 Thickness of Door (A) | 6 Size of Butt (D) |
| 3 Width of Stile (A) | 7 Distance from Top of Door to Top of Butt |
| 4 Width of Stop (B) | 8 Distance from Bottom of Door to Bottom of Butt |

For Doors opening out give measurements Nos. 1, 2, 3, 6, 7 and 8

For Special Shaped Doors or Panels, send Drawing

"READING" CYLINDERS

Sectional View of "Reading" Cylinder
showing tumblers
in operation

The cut shows the interior construction of the "Reading" Cylinder with Key inserted. The mechanism consists of a revolving plug with a series of pin tumblers. When the proper Key is inserted the pins are brought into line permitting the plug to rotate, which operates the lock by means of the cam at the rear end of the cylinder. The number of Key changes that can be made is practically unlimited

SCREWLESS SPINDLE DOOR KNOBS

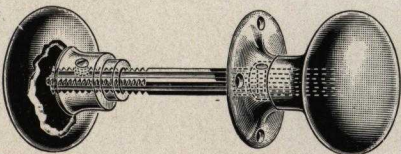

Screwless Spindle

The "Screwless" Spindle shown in the cut secures the Knob at any point desired without Side Knob Screws or washers. The adjustment is made on the inside Knob, the outside Knob being permanently fastened to the spindle. Furnished with Cast Bronze Knobs only, at extra cost

"Vassar" Spindle

The "Vassar" Spindle can be applied to Knobs having a Rose with high collar. The outside Knob is permanently fastened to the spindle, and the inside Knob is secured by means of a screw which passes through an opening in the high collar. The screw cannot work loose as it is covered by the collar when the Knob is in use. The Knob can readily be removed when necessary by turning it until the screw is opposite the opening. This method requires a Swivel Spindle to take up slight variations in thickness. Thickness of Doors must be specified. Furnished with Cast Bronze Knobs only, at extra cost

Combination Adjustable Spindle

The Combination Adjustable Spindle is grooved and threaded. It can be applied to any of our Cast Bronze Knobs with large shank, at extra cost. The adjustment is made at one end and tightened by a headless screw passing through the neck of the Knob into the groove of the spindle, the Knob at the other end being permanently fastened to the spindle. It admits of perfect adjustment without washers. This style spindle with adjustment at both ends is regularly furnished with our Glass Door Knobs. When used with Glass Knobs, state thickness of doors

One-Twelfth Dozen Sets in a Box

COMPLETE WITH SCREWS

CUTS ONE-THIRD SIZE

No. P1405¼ No. 1405¼
Plain Eulalia
These Push Buttons are fur-
nished with rods 14 inches which
may be cut to any length desired

Operated by Push Button direct, or Bell Pull direct or at any distance, producing a continuous ring similar to that of an Electric Bell, without the dirt and annoyance of a battery.
About 500 ordinary rings may be had from one winding.

NUMBER	INCH	BELLS ONLY	PER DOZ.
203	3½	Nickel-Plated Bell Metal Bells	\$ 19.35

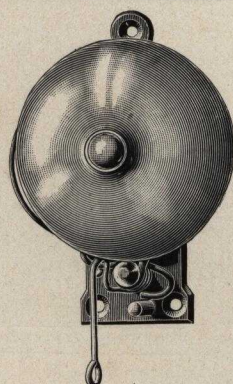

One-Twelfth Dozen in a Box

All our Electric Push Buttons can be changed to operate these Bells, without extra charge. Be particular to mention "For Electric Ring Bells."

OGDEN LIQUID DOOR CHECK AND SPRING

AUTOMATICALLY REGULATED REVERSIBLE FOR RIGHT OR LEFT HAND DOORS

The Ogden Check

U. S. Patents, Mar. 29, 1887, Apl. 19, 1898, Apl. 16, 1901, Apl. 14, 1908. Canada, Aug. 16, 1900, Great Britain, No. 13534, 1900.

SPECIFICATION OF SIZES

In determining the proper size Check to be used under normal conditions, the following Specifications should be adhered to

- Size
- A. For Screen and Light Inside Doors under 7 feet high, 2 feet 6 inches wide
 - B. " { Medium Inside Doors " 7 " " 2 " 9 " "
 - B. " { Light Outside Doors " 7 " " 2 " 4 " "
 - C. " { Heavy Inside Doors, Medium Outside Doors under 7 feet 6 inches high, 3 feet wide
 - D. " { Extra Heavy Inside Doors, Heavy Outside Doors under 7 feet 6 inches high, 3 feet 6 inches wide
 - E. " Extra Heavy Outside Doors under 8 feet 6 inches high, 4 feet wide
 - F. *Special*—For Extra Heavy Doors under 12 feet high, 4 feet wide. This check will work where everything else has failed. Will handle any door satisfactorily

THE FOREGOING SPECIFICATIONS APPLY TO DOORS UNDER NORMAL CONDITIONS

If the door is subject to strong draughts use a size larger check. Our "F Special" is designed particularly for large front doors of tall office and public buildings, railway stations, etc. It is a powerful, long, steady check, overcoming all danger of heavy doors closing too quickly, in consequence of high winds, elevator shafts and other abnormal conditions.

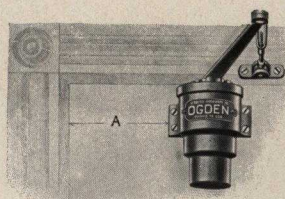

Each check adjusted for Right or Left Hand Doors, packed in a strong, neat wooden box; complete with screws and wrench.

REGULAR

Door opens 15 inches beyond a right angle
This is the best way to apply a Door Check, when-
ever it is possible to do so
This style will be sent unless otherwise specified
The following measurements should be used when
Ogden Checks are applied in this position

DISTANCE FROM HINGE EDGE OF DOOR	SIZE OF CHECK					
	A	B	C	D	E	F
To Edge of Check—A—	5½ in.	5¾ in.	6½ in.	7 in.	8 in.	9 in.
To Arm Bracket . . .	8¾	9	10	11	12¼	14¼

WITH REGULAR BRACKET

Door opens 8 to 10 inches beyond a right angle
The bracket is attached to the soffit or under side of
the door casing
The following measurements should be used when
Ogden Checks are applied in this position

DISTANCE FROM HINGE EDGE OF DOOR	SIZE OF CHECK					
	A	B	C	D	E	F
To Edge of Check—A—	4½ in.	4¾ in.	5½ in.	6 in.	7 in.	8½ in.
To Arm Bracket . . .	7¾	8	9	10	11¼	13¾

WITH FLUSH OR HANGING BRACKET

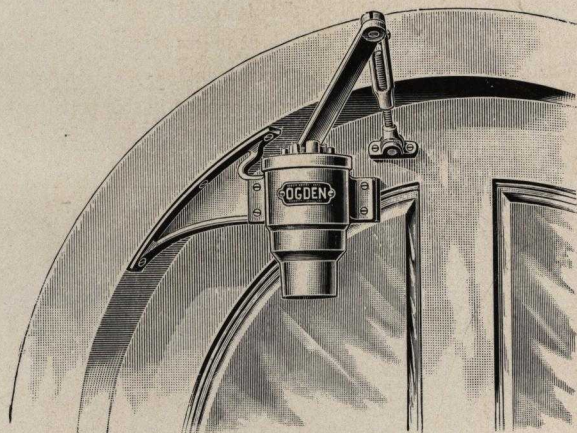

Door opens 8 to 10 inches beyond a right angle
The Flush Bracket is furnished for doors opening
out, hung flush or when the space on the soffit
or under side of door casing is not wide enough
to attach the Regular Bracket. Mention Hand
wanted
The following measurements should be used when
Ogden Checks are applied in this position

DISTANCE FROM HINGE EDGE OF DOOR	SIZE OF CHECK					
	A	B	C	D	E	F
To Edge of Check—A—	4½ in.	4¾ in.	5½ in.	6 in.	7 in.	8½ in.
To Arm Bracket . . .	7¾	8	9	10	11¼	13¾

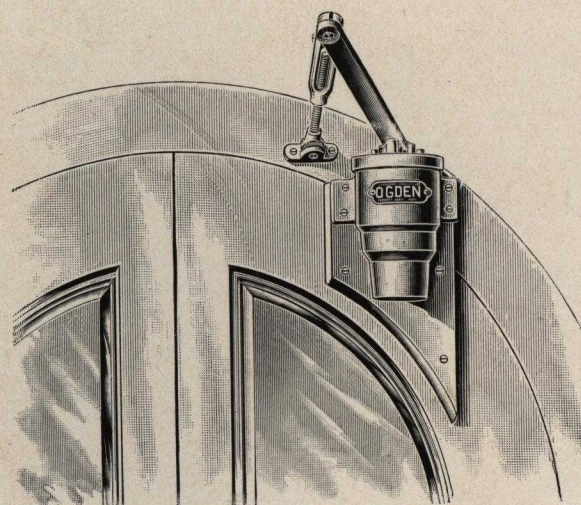

OGDEN LIQUID DOOR CHECK AND SPRING

SPECIAL BRACKETS

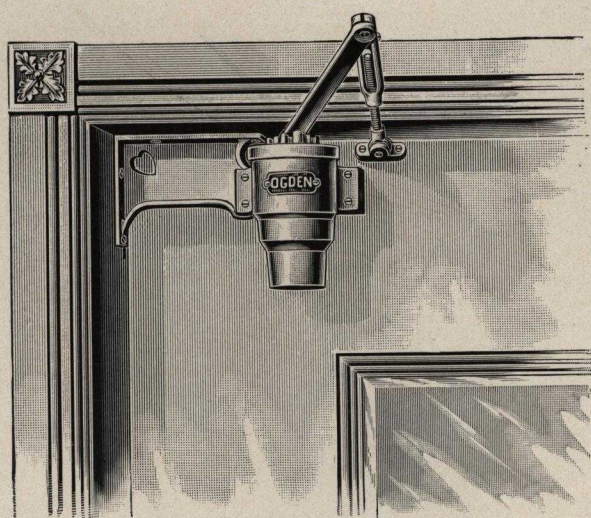

576

Right Hand Bracket for Recessed Round Top or Gothic Door. Cut shows Left Hand Door with Right Hand Check. Can furnish either Hand

Left Hand Flush Bracket for Round Top or Gothic Door. Cut shows Left Hand Door with Left Hand Check. Can furnish either Hand. Flush Brackets can also be furnished with Offset for Doors with Moulding

Right Hand Corner Bracket. Cut shows Left Hand Door with Right Hand Check. Can furnish either Hand

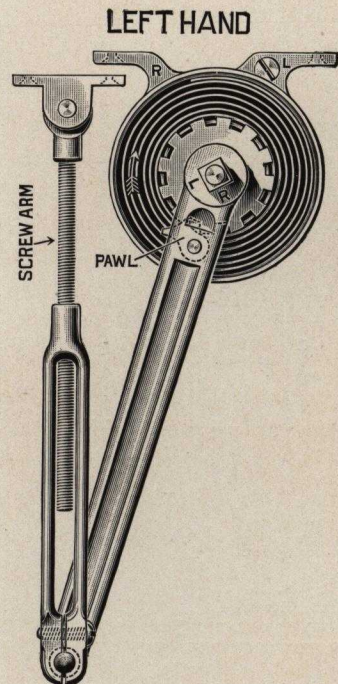

THE cuts on this page show the manner in which special brackets are usually applied. We can furnish to order any style bracket that may be required.

All orders for Door Checks with special brackets must be accompanied with sketch of opening, detail and full information regarding size, situation of doors, etc., as we cannot standardize Special Brackets owing to the changes in conditions.

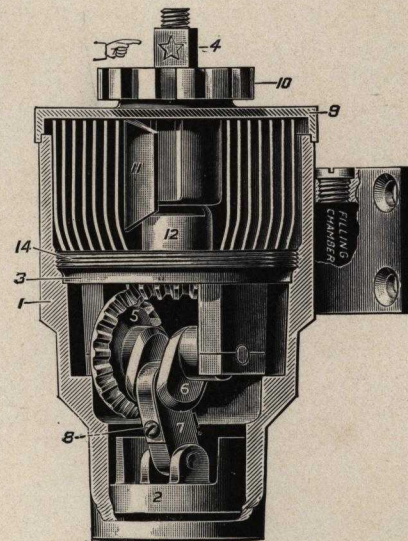

OGDEN LIQUID DOOR CHECK AND SPRING

DIRECTIONS FOR APPLYING CHECKS

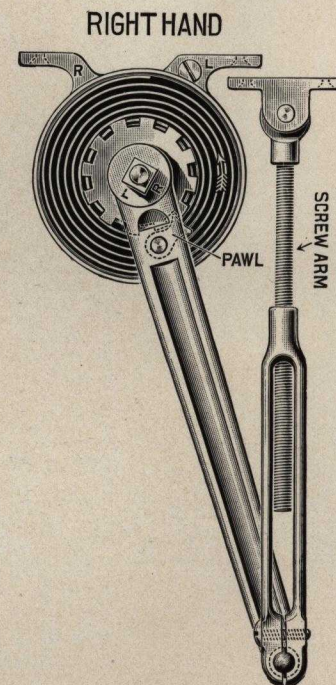

577

Top view of Arm and Spring
Left Hand

Sectional View of
Ogden Door Check

Top View of Arm and Spring
Right Hand

WHEN attaching the check pay particular attention to the condition of the door. See that it is not hinge-bound, does not rub anywhere and that it latches easily. Before fastening the screw arm bracket to the casing, adjust the screw arm by turning the screw in or out, so that it will stand at right angles with the door when closed. See above cuts showing the proper position of the spring and arm. Place the check on a line with top edge of the door, using the measurements given on page 575 to determine the distance from the hinge edge of door to edge of check. The checking power is automatically controlled on the inside of the check. It is only necessary to apply the spring power (usually four notches is sufficient). The check will then regulate itself.

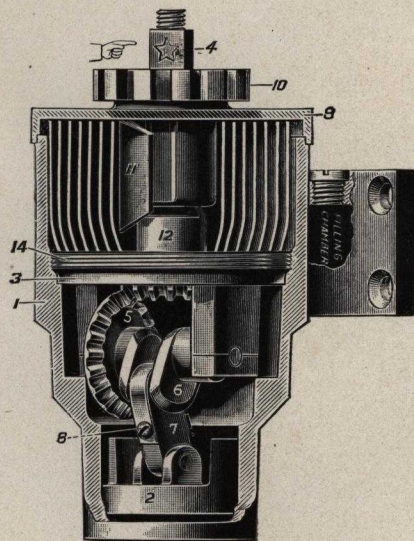

To change from Right to Left Hand, remove the nut and washer, lift off the arms and ratchet sleeve, pry off the cover, take out the coil spring, turn it over and replace it with the hook engaged on the side L as shown in the above cut. Put on the cover with the stop forward, replace arms with the L opposite the star on the spindle, and with the ratchet pawl at left of stop on cover. Replace the washer and screw the nut down tight.

To change from Left to Right Hand, follow above directions, but reverse the spring and engage it at the side R. Put on the cover with the stop in front. Replace the arms with ratchet pawl at right of stop and with the R opposite the star.

See sectional cut of check; note the "star." When the star is in front the piston is in its proper position. For Right Hand the letter R on the arm must be opposite the star. For Left Hand the letter L must be opposite the star.

OGDEN LIQUID DOOR CHECK AND SPRING

REPAIRS AND LIST OF PARTS

Sectional Cut showing parts
Nos. 1 to 14 inclusive

REPAIRING CHECKS

All parts of the Ogden Check are interchangeable, and can usually be replaced by any ordinary mechanic without incurring the delay and expense of returning the Check to our factory for repairs. A list price of \$1.20 will be charged for repairing Checks, in addition to the cost of replacing broken or damaged parts, unless such parts are defective through fault in manufacture. In ordering parts state letter indicating the size of Check.

Doors Opening All the Way (180 Degrees)

To insure the best possible results, doors should not be allowed to swing all the way back, unless absolutely necessary. When so required, however, we furnish extra long arms for this purpose, as listed below. In ordering, give thickness of doors to determine the length of arm necessary.

GUARANTEE

All Ogden Door Checks are thoroughly tested before leaving our factory, and are guaranteed perfect in construction material, and when applied under normal conditions. We will not hold ourselves liable, however, for any breakage caused by using Checks smaller than the proper size, as designated by us, or for Checks improperly applied. Full directions, which should be carefully followed, are packed with every Check.

625

A detailed illustration of a mechanical device, likely a lock or latch, showing its internal components and a handle. The device is shown in a cross-sectional view, revealing a cylindrical body with a handle on the right side. The handle has a rounded, bulbous end. The main body is divided into several sections, with a central cylindrical component that appears to be a bolt or a locking mechanism. The device is mounted on a rectangular plate with four circular holes, two on each side. The overall design is intricate and suggests a high-quality, durable mechanical component.

8 inch, One-Half Dozen in a Box; other sizes, One Dozen

A detailed black and white illustration of a mechanical device, possibly a pump or a valve. It features a central horizontal shaft with a handle on the left and a spout on the right. The handle has a curved, ergonomic shape. The spout is a small, teardrop-shaped outlet. The device is mounted on a rectangular base with several circular holes. The overall design is functional and industrial.

Patented
Regular Style
Nos. 44 to P1145

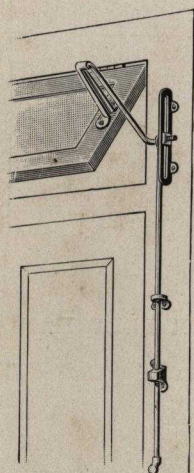

Heavy Slide
used with
3/8 and 1/2 in. Rod

In applying, place the locking case as close to the thumb-piece as the movement of the transom will allow
Each Lifter is complete in itself; the bracket and other parts being joined together, ready for use
Same Lifter can be used in nine positions as shown on following page

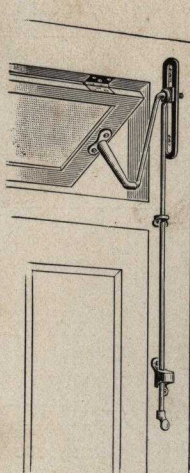

"READING" TRANSOM LIFTERS

689

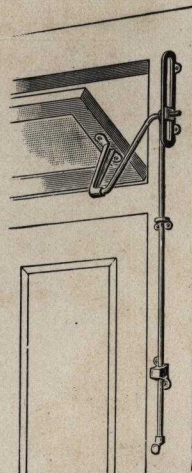

The following cuts show the "Reading" Transom Lifter applied to transoms in nine different positions, without changing any of the parts

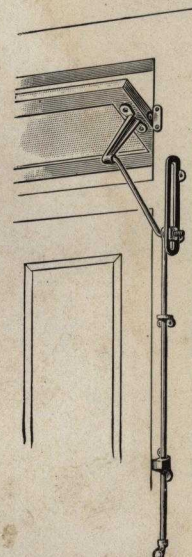

**Flush Transom
Top hung, opening in**

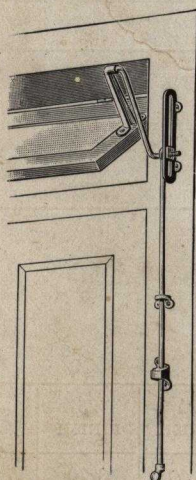

**Flush Transom
Top hung, opening out**

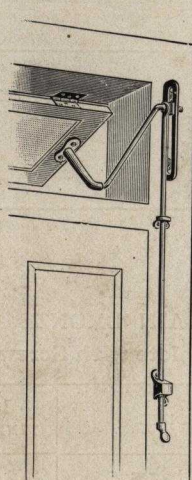

**Flush Transom
Bottom hung, opening in**

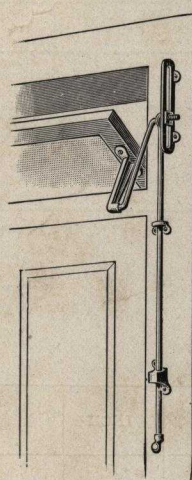

**Flush Transom
Centre hung**

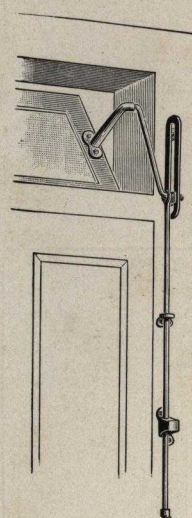

**Recessed Transom
Top hung, opening in**

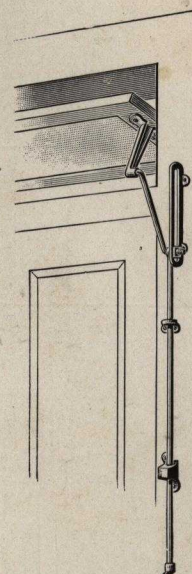

**Recessed Transom
Top hung, opening out**

**Recessed Transom
Bottom hung, opening in**

**Recessed Transom
Bottom hung, opening out**

**Recessed Transom
Centre hung**

SPECIAL FEATURES

The same Lifter can be used in any of the nine positions shown above, which practically cover every style of hanging transoms that move up and down, whether hung at top, bottom or centre.

"Reading" Transom Lifters work equally well on transoms fitting flush with the door casing or recessed, without changing any of the parts.

They can be adjusted to escape a projecting bead or moulding at the side of door frame by simply turning the adjusting screw at the end of the arm to which the bracket is attached.

The Automatic Clamping Device or grip is made of hardened steel. It is self-locking and will not allow the transom to slip or fall, preventing any danger of breaking the glass.

Only one hand is required in operating the regular style Lifter. The grip is released by pulling the thumb-piece forward, which allows the transom to be raised or lowered.

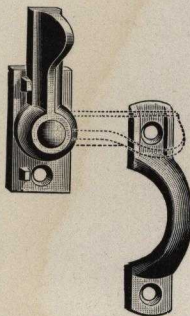

Each Lifter is complete in itself; the bracket and other parts being joined together, ready for use.

Dealers who handle the "Reading" Transom Lifter need only carry one stock, instead of being obliged to keep several styles or "classes" to meet various requirements.

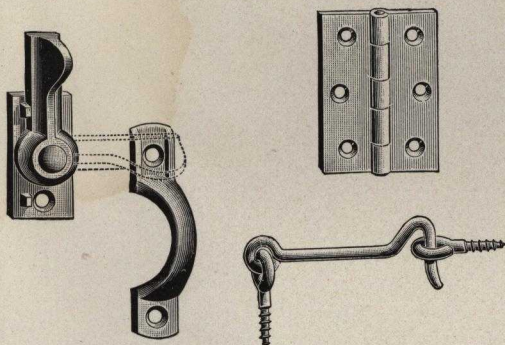

For description and List Prices, see preceding page

783

A detailed technical illustration of a mechanical device, likely a press or clamp, shown in a side profile view. The device consists of a large, horizontal handle at the top, which is connected to a central vertical frame. The frame has a curved section and a base. A threaded rod with a large, ornate handle is attached to the base. The illustration is rendered in a classic, engraved style with fine lines and shading to indicate the three-dimensional form and mechanical details.

CAREFULLY READ DIRECTIONS

 DO NOT USE MECHANICAL FORCE.

FIRST

With a Coin turn both screws two or three times (not more) to the left. Stops prevent their removal.

SECOND

Open to page desired, then spread apart as shown. A stop prevents complete separation.

THIRD---Leaves may then be easily removed or inserted.

FOURTH ---Press binder firmly together while open. Close cover and stamp with hand in the space between screws. See that none of the sheets are out of place. **LOCK SECURELY** by pressing cover down firmly and turning screws to right.
